HB 2359-S by House Committee on Transportation (originally sponsored by Representatives Fisher, Cooper, Kessler, Berkey, Jackley, McIntire, Conway, Wood, Kagi and Ogden)

Authorizing county financing of regional transportation improvements.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Finds that:

(1) The capacity of many of Washington state's transportation facilities have failed to keep up with the state's growth, particularly in major urban regions;

(2) The state cannot by itself fund, in a timely way, many of the major capacity and other improvements required on highways of statewide significance and for other regional transportation projects in the state's largest urbanized areas;

(3) Providing a transportation system that maintains efficient mobility for persons and freight requires a partnership between the state, local, and regional governments and the private sector;

(4) Timely construction and development of significant transportation improvement projects can best be achieved through enhanced funding options for governments at the city, county, and regional levels. The legislature intends to use existing governments, existing tax authority with enhancements, and existing authority for interlocal cooperation among governments to address critical local, regional, and statewide roadway and multimodal needs; and

(5) Voters must be assured that locally generated moneys to address transportation projects will remain within the taxing jurisdiction and that the tax revenues will be used to address an identified list of projects and activities.

Provides that the act shall be null and void if appropriations are not approved.

Concerning the establishment of the forest products commission.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Provides that, if the director determines under RCW 15.100.120(3) that the requisite approval for the establishment of a commission has not been given, any subsequent efforts to create a commission must follow the procedures established under chapter 15.100 RCW for the initial nomination and election of members.

Provides that the association responsible for giving the director notice under RCW 15.100.040 that substantial interest exists in forming a forest products commission shall reimburse the department for its costs associated with conducting a proceeding to initiate a commission under RCW 15.100.040 and 15.100.120. Finds that storm water management must provide protection of natural resources while also providing state and local agencies, development interests, and others with a flexible set of tools and alternatives that can help ensure cost-effective storm water management and detention.

Finds that significant fragmentation in authority exists between local, state, and federal agencies in managing storm water. Finds that small businesses lack the resources that state agencies routinely use in defending administrative rules that may have been adopted unlawfully, without regard to proper administrative procedures, or which exceed an agency's statutory authority.

Finds that it is necessary to place the burden of demonstrating that new administrative rules are adopted in a lawful manner upon the adopting agency.

Requires that designated smoking areas must be separate and fully enclosed on all sides by solid walls or windows that extend from floor to ceiling, and have a full door between the designated smoking area and an adjacent nonsmoking public place. The door must remain closed when not actively in use by patrons or staff for entrance or exit.

Requires designated smoking areas to be ventilated at a rate of at least sixty cubic feet per minute per smoker (calculated on the basis of the maximum number of smokers expected during the course of normal operations), which ventilation may be supplied by transfer air from adjacent areas.

Provides that sufficient negative pressure must be maintained at all times in designated smoking areas to prevent smoke migration to adjacent nonsmoking areas.

Requires designated smoking areas to operate with a separate mechanical exhaust system and be exhausted directly outside, with out recirculation of air to nonsmoking areas.

Provides that, if the mechanical exhaust system, negative pressure, or other barriers or ventilation mechanisms for a designated smoking area are not operating properly, smoking must be prohibited in the area until repairs are completed.

-- 2002 REGULAR SESSION --

Jan 30 First reading, referred to Health Care.

HB 2863 by Representatives Chase, Linville, Conway and Edwards

Ensuring state payment for long-term care services.

Finds that quality care cannot be assured by state mandates alone. Sufficient resources must be dedicated to long-term care services to facilitate competitive salaries that will attract and retain quality caregivers.

Recognizes that past failure to provide such resources has contributed to caregiver recruitment and retention problems in all long-term care settings. These problems can only degrade the continuity and quality of care for those persons dependent upon such care.

Finds that state government has assumed the responsibility of purchasing long-term care services for a large proportion of those receiving such services.

Finds that to ensure that state government's expectations concerning the quality of long-term care services are met, its payments for those services should be

fair and reasonable and adequately compensate the current costs incurred in providing those services.

Requires the secretary of state to submit this act to the people for their adoption and ratification, or rejection, at the next general election to be held in this state, in accordance with Article II, section 1 of the state Constitution and the laws adopted to facilitate its operation.

Jan 30 First reading, referred to Local Government & Housing.

HB 2866 by Representatives Doumit, Sump, Reardon, Schoesler, Linville, Kessler, Morris, Mulliken, Hatfield, Pearson, Grant, Armstrong and McMorris

Limiting overlapping jurisdiction regarding the permitting of storm water projects.

Recognizes that the department of ecology is primarily responsible for the approval of storm water projects.

Expresses a belief that once the department of ecology approves a proposed storm water project, it is inappropriate for the department of fish and wildlife to require a major redesign of that project in order for the applicant to obtain hydraulic project approval.

Declares that it is more appropriate for the department of fish and wildlife to defer the design elements of a storm water project to the department of ecology and focus its

own efforts on determining reasonable mitigation or conditions for the project based upon the project's potential harm to fish.

Declares an intent of the legislature to restore some balance over conditions attached to hydraulic permits, and to minimize overlapping state regulatory authority regarding storm water projects in order to reduce waste in both time and money while still providing ample protection for fish life.

-- 2002 REGULAR SESSION --

Jan 30 First reading, referred to Natural Resources.

HB 2867 by Representatives Fromhold, Ogden, McMorris, Grant, Haigh and Delvin

Mitigating the effects of the aquatic pesticide national pollutant discharge elimination system permit required as the result of a recent court decision.

Finds that the recent federal court of appeals decision in *Headwaters, Inc. v. Talent Irrigation District*, 243 F.3rd 526 (9th Cir. 2001) imposes a duty to obtain a national pollutant discharge elimination system permit under the clean water act for the application of pesticides to irrigation canals. This duty is also extended to other individuals and organizations that apply pesticides to other waters, where no duty existed before the *Talent* decision.

Finds that the costs associated with the issuance of the national pollutant discharge elimination system permit now required by the department of ecology as a result of the federal decision is unfairly burdensome to the affected individuals and organizations.

Declares an intent to reduce the burden of the federal decision on those individuals and organizations.

-- 2002 REGULAR SESSION --

Jan 30 First reading, referred to Agriculture & Ecology.

HB 2868 by Representatives Ericksen and Linville

Provides that, if a commercial or industrial permittee, operating under a permit issued under either RCW 90.48.160 or 90.48.260, operates for one year without violating the conditions of the permit, that permittee qualifies for a three percent reduction in the fees charged by the department for each consecutive year in which the permittee has not violated the permit conditions.

Declares that, for purposes of calculating fees for 2003, the department shall make the reductions retroactive to year 2000 for all permittees that have not violated the conditions of their permits since 2000.

Requires the department to submit a report to the appropriate legislative committees by December 1, 2002.
